

SANABA KANTÉ

Data Analyst | Data Analytics Student

Bathurst, New Brunswick | 506-232-2800 | kantesanaba78@gmail.com | linkedin.com/in/sanaba-kanté-70906830b | mo2kk4ry.github.io/index.html

PROFILE

Data-driven professional with hands-on experience across analytics, program administration, and BI reporting. Skilled in transforming raw, multi-source data into clear dashboards, tracking systems, and reports that support decision-making for boards, academic teams, and program stakeholders. Comfortable owning data end-to-end — collection, cleaning, structuring, visualization, and communication — using Power BI, SQL, Excel, and Python. Known for analytical rigor, autonomy, and the ability to build practical tools that scale from a single pilot to organization-wide use.

CORE COMPETENCIES

- Data collection, cleaning, structuring, and validation across multiple concurrent programs (SQL, Excel, Python)
- Power BI dashboard design, DAX, and Power Query for interactive reporting
- Building tracking systems and dashboards for program monitoring, attendance, and progress reporting
- Translating business/program needs into BI and reporting solutions
- Data quality control, consistency, and confidentiality
- Clear communication of insights to boards, leadership, and non-technical stakeholders
- Data modeling and basic ETL preparation

Tools: Power BI (Power Query, DAX, dashboards), SQL, Advanced Excel, Python (pandas), Microsoft 365

EXPERIENCE

Bilingual Program Support and Project Assistant (Hybride)

Black Business and Professional Network (BBPN)

June 2025 – Present

- Manage participant and student data across several concurrent programs, from initial collection through ongoing follow-up, to track progress and outcomes
- Designed and built an Excel-based tracking system giving BBPN a centralized overview of program progress, attendance, and participant status across all programs
- Build dashboards that turn multi-program data into clear, easy-to-navigate visuals, making trends and results instantly understandable for staff and leadership
- Transform raw program data into clear, easy-to-understand summaries and reports for BBPN board members to support decision-making
- Currently expanding the Excel tracking system beyond its pilot program into a scalable tool for use across upcoming programs
- Support day-to-day program administration and project coordination in both English and French

IT & Analytics Support Assistant (Part-Time, Remote)

Collège communautaire du Nouveau-Brunswick (CCNB) – Bathurst, NB

October 2025 – March 2026

- Extracted and analyzed academic data from multiple sources to identify actionable insights supporting operational and compliance needs
- Designed clear and effective visualizations to facilitate understanding and decision-making across academic and administrative teams
- Led and contributed to several concurrent projects simultaneously, managing priorities autonomously in a fully remote environment
- Prepared and drafted monthly internal newsletters based on analytical findings, transforming complex data into concise communications
- Contributed to institutional chatbot development including data structuring, technical documentation, and functional testing
- Documented analytical processes, workflows, and results for internal reference and data governance
- Ensured institutional data confidentiality and integrity throughout all analytical activities

Data Analyst & Project Lead — Award-Winning Smart Safety Bracelet

Cité des sciences et de l'innovation de Guinée - Conakry

2025

- Led development of a smart safety bracelet solution during a competitive hackathon, coordinating a multidisciplinary team under strict deadlines
- Translated user safety needs into measurable performance indicators and data-driven features

- Designed and monitored functional testing processes to evaluate device performance and reliability
- Developed dashboards and visualizations to track key metrics and support project decision-making
- Delivered final pitch presentation to judges and stakeholders; project awarded top recognition and selected for continued development

Project Assistant — Air Quality Monitoring Initiative

Cité des sciences et de l'innovation de Guinée - Conakry

Sept. 2024 – Apr. 2025

- Participated in environmental data collection, monitoring, and preparation of datasets for analytical reporting
- Monitored deliverables and timelines; supported project coordination and structured internal communication

Junior Data Analyst — Learning & Personal Projects

Maven Analytics, Kaggle, YouTube

Sept. 2024 – Apr. 2025

- Conducted exploratory data analysis on public datasets using Excel, Python, Power BI, and SQL
- Developed dashboards and reports to simulate real-world business insights generation

EDUCATION

Diploma in Data Analysis

Collège communautaire du Nouveau-Brunswick (CCNB), Bathurst, NB

2025 – Present

Relevant coursework, 1st year: Descriptive & Exploratory Data Analysis, Applied Statistics, Data Visualization & Graphical Representation, Mathematics for Computer Science, SQL & Programming Languages, Data Analysis with Excel, Data Analysis with Python, Data Cleaning & Preparation (Power Query, Power BI)

Certificate – IT & Data Science

Bountiful Technologies

2023

Computer Science (not completed)

University Gamal Abdel Nasser de Conakry

Sept. 2024 – Jul. 2025

CERTIFICATIONS

- Maven Analytics – Thinking Like an Analyst
- Maven Analytics – Data Career Roadmap
- IBM – Python & SQL for Data Science
- IBM & Cisco Data Analytics Badges
- Cisco – Data Analytics (Excel, SQL, Tableau)
- Customer Service Pathways

Currently pursuing: Project Management Certifications

ACHIEVEMENTS & AWARDS

- Authored a data report/guide that was adopted and published on CCNB's official website, making it accessible college-wide
- Built BBPN's program tracking system for automatic reuse across new programs, eliminating the need to rebuild it from scratch each time
- Awarded top recognition at the Cité des sciences et de l'innovation de Guinée hackathon for the Smart Safety Bracelet project, selected for continued development

VOLUNTEER EXPERIENCE

Business & IT Sector Representative

CCNB Bathurst

Current

- Represent Business & IT students in academic and institutional matters
- Participate in coordination meetings and communicate student needs to administration
- Contribute to campus initiatives and internal communication

Data Entry Agent (EMIS)

Canadian Red Cross

- Managed and maintained critical humanitarian datasets, ensuring accuracy, integrity, and timely reporting to support operations and emergency response

LANGUAGES

French: Native | English: A1–A2 (CCNB)
